

## SEA LION series

Washing and conservation :

The Undersuit can be washed in a washing machine but **without spinning**.

For better results we are recommending to wash separately (only the undersuit in the washing machine ).

To dry lying. It is possible to hang the warmer on the drier after the majority of water will already drip.

It is important to wash the undersuit in special chemicals for cleaning outdoor clothes.

Remember! **Ordinary powder is destroying fabrics, from which the undersuit is made!**
